Message from the President

by Professor Gerard Pardoen

University of California, Irvine

The main purpose of this issue of the CUREE News is a bit out of the ordinary—to provide an updated CUREE Membership Roster. We typically compile and distribute a roster annually. However, since the turn of the year, our membership has grown significantly and become national in composition, making the roster published a few short months ago very out of date.

Directly responsible for the big change in our roster is the fact that, as reported in the last CUREE News, our organization reformulated itself as a national entity, complete with revised Bylaws and re-stated Articles of Incorporation. Beginning in late 2000, we actively encouraged universities from around the country to apply for membership. I am happy to report the response has exceeded even our optimistic projections.

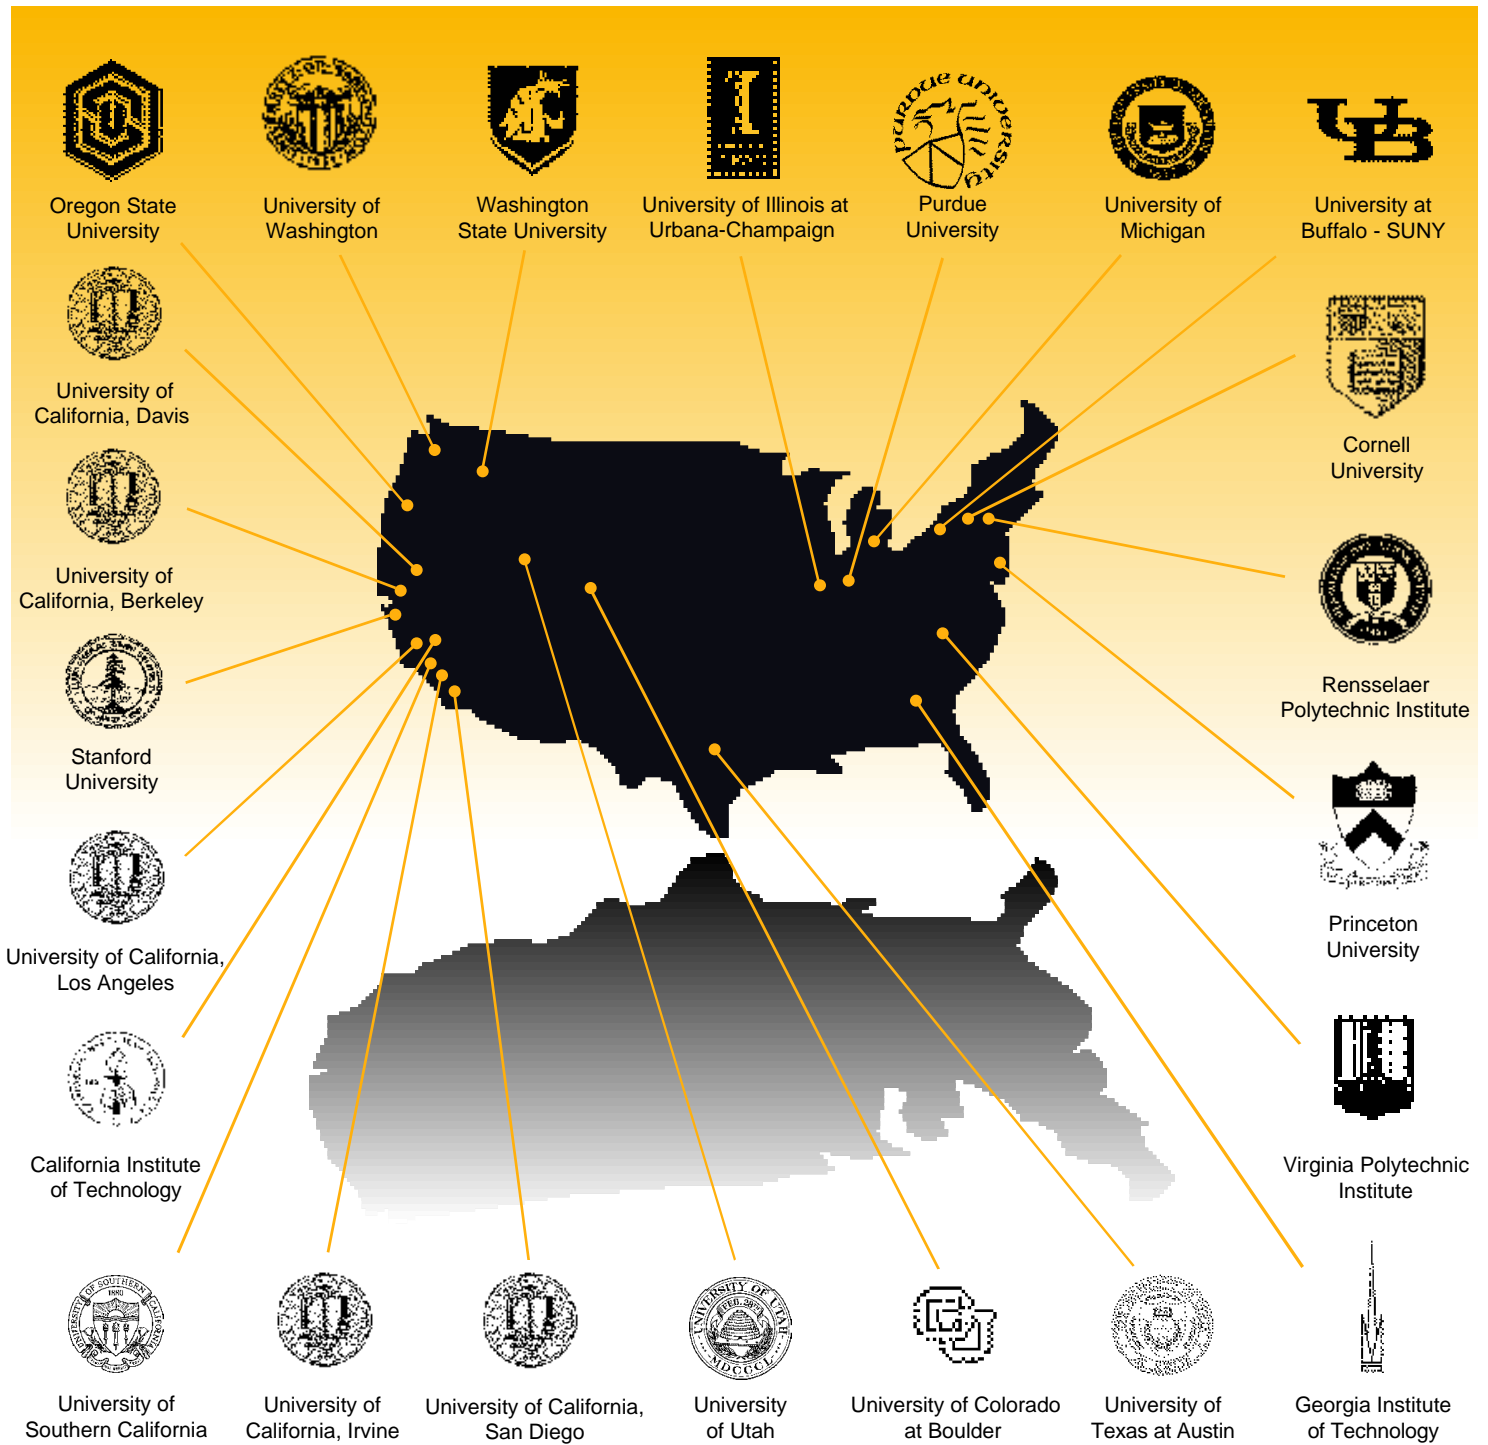

At the moment—and several other universities are in the process of submitting applications—CUREE has 23 University Members. (See page 2). The number of individual members has grown to approximately 300 professors. To put that in context, we have tripled the number of University Members, which extend to 13 states, and the number of individual members has doubled. Our Board of Directors has six new members from recently admitted universities (see Board directory on the last

page). With the organization's previous focus on California, we are pleased to have two new Professional Practice Directors from outside the state, one from the Midwest and one from the East.

Given our national position, we are actively working on planned projects and activities to engage our membership and increase its sense of community. We are periodically inviting our members to suggest future possible CUREE projects. CUREE will provide seed money to develop such concepts to the stage of being viable proposals. As before, we are collaborating with a variety of individuals and organizations beyond our membership. While remaining centered on our core capability and interest—engineering research conducted at universities on the earthquake subject—we continue to make collaboration with other communities a basic part of our strategic plan.

To new members, I welcome you to the organization and hope you find it adds value to the field. To prospective members, let me direct you to the membership application information posted on the CUREE website (curee.org): Click on "Membership Application" on the home page menu. Alternatively, you can obtain the same information by contacting the CUREE office. ■
